## RECOMMENDATION LETTER

The current letter is to confirm that during 3 month in 2012 we have had a contract with Maritza Logistic Service LTD, for off-loading operations in a PV Park near Vratsa, Bulgaria, 2 days/week, every week, with a 90 tones crane and a team of 3 crane operators.

The conclusions are as it follows:

- The equipment have been off-loaded carefully according our technical condition;
- The crane conductor and crane operators acted into a professional manner;
- All the quality and safety measurements have been respected during the off-loading operations – all the crane operators used safety equipment;
- The crane worked proper and was efficient during the off-loading operations.

This letter is to be considered a recommendation in attention of whom it might concern.
